

UNICO FILTER

The UNICO filtration system was designed for small to medium sized manufacturers needing to filter both finished and heavy solids products with a **single solution**; obtaining a filtered product of excellent quality with a turbidity below 1 NTU.

BENEFITS

- Filters product to turbidity below 1 NTU
- Significantly reduces product loss
- Retention of color, structure, aroma and taste
- Filters both wine and lees, as well as many other beverages
- No D.E.

FEATURES

- Entirely built in AISI 304 stainless steel
- Compact size unit on swiveling wheels
- Base model equipped with 3 microfiltration modules, expandable to 6 or 9 microfiltration modules
- Flow rates range between 200-900 gal/hour depending on configuration
- For use on wine, lees, cider, mead and other beverages
- Stainless steel membrane technology for lees filtration
- Fully automatic system
- Full touch screen allows user to easily set all filtration parameters
